Minimal volume of compulsory quotations for market-maker is set in size 1,000 monthly payment indicators. Bonds have been included into KASE's category "A" official listing since December 12, 2006. Primary market sector

No deals were made in this sector of KASE during the analyzed period. No offerings were made.

Secondary market sector (purchase and sale)

A total of 288 deals amounting to \$79,593.7 th. or KZT10,048.0 m. were made in shares during the analyzed period. In comparison with the previous period (January 18-24, 238 deals, \$63,432.5 th. or KZT7,934.4 m.), turnover of the sector has increased by 25.5%. At that, 11.5% of deals in quantitative expression and 68.7% in volumetric expression were nego. In the previous period these indicators were 7.1% and 36.1% correspondingly.

During the analyzed period deals were made by (in the parenthesis are given comparable indicators of the previous period) KASE's 28 (26) members on 26 (26) instruments. At that: 2.3% (5.9%) of gross-turnover of the market – 4.6% (5.4%) on purchasing transactions and 0.1% (6.3%) - on sales transactions were controlled by “pensions”; through the depot accounts, registered on physical persons for the week had passed 15.6% (8.8%) of exchange's turnover of shares – 19.6% (8.8%) - on purchasing transactions and 11.6% (8.8%) - on sales transactions.

The given statistics shows some energization of the share market on the week, which had passed not without participation of physical persons.

In relation of price market had change a little. In the analyzed week weighted average daily prices of 58% (46%) of names of shares involved into deals, made on KASE by methods of opened trades grew, prices of 27% (38%) – fell, prices of 12% (13%) – remained unchanged. Price of DNB (Danabank JSC) was nothing to compare with. In the described period shares prices changed positively in the range from 0.03% (UTMKp) to 50.0% (ROSA), negative change – from 0.99% (ATFBp8) to 70.2% (TSNAp).

In other words, market still demonstrates optimism on the background of absence of interesting news and “with all might” is trying to grow further, but it is resulting not very successfully. Brokers managed to increase the rates of almost all favorites, braking the growth of market on the previous week, however the decrease of average weighted price of AMGZ (CNPC Aktobemunaygas JSC) by 11.1% and BTAS (Bank TuranAlem JSC) by 1.5% had almost brought to a naught all these efforts. KASE_Shares index on the week did not manage to go to the historical maximums. It can be said that since middle of January it had gone to side trend, working the fluctuations between 2400 and 2550.

From the liquid securities on the week by the growth of prices had attracted the attention: EXBN (Eximbank Kazakhstan JSC), which are more actively are involving by traders to the exchange trades, KZTK (Kazakhtelecom JSC), grown by 5.6%; KKGB (Kazkommertsbank JSC, +2.8%); HSBK (Halyk savings bank of Kazakhstan JSC, +2.3%); RDGZ (Exploration Production KazMunayGas JSC, +2.0%); ATFB (ATFBank JSC, +1.7%).

It also must be noted the common shares of Alliance Bank JSC (ASBN), collecting liquidity on the local market and rapidly growing in price on the background of impressive success of the issuer in the field of retail crediting and growth of assets. In this context, to put it mildly, the original seems the price offer of Board o directors of the bank l the frames of offering of new shares “for unlimited circle of people” (see the “Main news of the market”). It remains only to complain about hole in Kazakhstan legislation, due to which by it are not regulated any long terms between date of announcement of such kind (it is IPO!) and date of starting of applications acceptance. Order of giving, registration and satisfying of these bids is also may be the secret of Board of directors, because its corresponding decision is not demanded to wire openly in the total volume and with the proper degree of activity. It is also very surprising, for what the bank is offering new shares five times lower then the current market price, losing at that 8.3 m. dollars of the potential authorized capital.

Primary market sector

No deals were made in this sector of KASE during the analyzed period. No offerings were made.

Secondary market sector (purchase and sale)

A total of 101 deals amounting to \$116,277.9 th. or KZT14,667.3 m. were made in bonds during the analyzed period on KASE. In comparison with the previous period (January 18-24, 38 deals, \$19,174.8 th. or KZT2,403.6

m.), turnover of the sector has increased 6.1 times. At that, 7.9% of deals in quantitative expression and 0.2% in volumetric expression were nego. In the previous period no such deals were made.

During the analyzed period deals were made by KASE's 21 (17) members on 40 (23) instruments. At that, 17.2% (16.2%) of gross-turnover – 22.6% (32.2%) on purchasing transactions, and 11.7% (0.2%) - on sale transactions went through the accounts of pension market's subjects. Through the accounts of depot, registered on physical persons, for the week had left 11.3% (16.5%) of the exchange's gross-turnover of corporate bonds – 1.0% (0.8%) - on purchase operations and 21.6% (32.2%) - on sale operations.

The significant energization of the corporate bond market on the week was caused by increased interest of traders to strongly re-sold ASFb7 (Astana-Finance JSC) and partly to TEBNb11 (Temirbank JSC).

By the totals of the period weighted average daily net prices of 10 bonds grew on the opened market, prices of 27 bonds – fell, prices of 1 remained unchanged. Prices of new TSBNb6 and TEBNb10 was nothing to compare with. Re-bought seemed ASFb7 and KIBNb1 with growth of net prices by 8.5% and 5.4% correspondingly, while slightly re-sold seemed BTAIb3 (-7.5%) and BTASb7 (-5.9%). Yield to maturity for buyer on deals' made decreased of 14 bonds, increased – of 24.

So, it did not happen to speak about price equilibrium on the market this time. KASE_BY index, jumped on January 25 due to corresponding movement of quotations of BTASb7 to the new borders, stayed on them during whole week and it seems that it pulled the rest market by itself. However the analysts of IRBIS are not inclined to re-estimate the potential of new trend, caused, most likely, by expectations of innovations from AFS related to banking sector.

Detailed data on corporate bond market is given in trades results table.

Secondary market sector (purchase - sale)

In the analyzed period total volume of 39 deals made on KASE had reached KZT17,520.0 m. (\$138.9 m.). In the last period the turnover of the given sector did not exceed KZT2,383.9 m. or \$19.0 m. with 21 deals. Stake of exchange's turnover in the total volume of Kazakhstan secondary market of GS on comparable operations of purchase and sale was equaled to 100% (on the previous – 100%).

As results of conducted analysis show, the energization of the secondary market of GS on the week was caused by the effect of the local factor – increased supply of notes and MEOKAM by one of second tier banks, which however did not collapsed the market and found the grateful purchasers in face of other banks and pension funds. The series of deals conducted, of course did not change the general picture of the market, liquidity of bonds on which leaves much to be desired. However the last promises of Ministry of finance and National Bank (with which beginning of every new year is so rich) give the sluggish hopes on positive changes in this sector.

More detailed data about exchange's trades are given in the table.
